

Acknowledgment

The devices were fabricated by the authors using the facilities in Marvell Nanofabrication Laboratory, University of California, Berkeley and Center for Nano and Micro Manufacturing, University of California, Davis. This work was supported in part by Intel University Research Office Project “Scalable, Athermal, Low Power, High Bandwidth Silicon Photonic Technologies”. The authors would like to thank Dr. Hai-Feng Liu and Dr. Mario Paniccia of Intel Corporation for their encouragements.
